

Supplier of steel structures

- In all shapes and sizes

Technical solution design assistance
Installation assistance
Metal hardening capacity
Long reference list
Certified welders
NS-EN 1090

REFERENCE PROJECTS

Drammensbrua - The old bridge was lifted and secured before the old foundation was demolished. Prefabrication of steel structures was performed in our workshop. An on-site workshop was established below the bridge for the production of columns as work on the axis progressed.

EWOS Florø - Production and installation of more than 3700 m² steel decks for a new factory building.

Access bridges Paulertjønn and Solum - Production of three drilling platforms and bridges covering more than 1000 m².

Liepaja - Steel structure for elevator.

Bagn bru - Redesign of formwork trolley. Prefabrication and installation. Also included design, prefabrication and installation of formwork cassettes.

HARDENING KILN

Dimensions and capacity

- Max workpiece weight 8 tonnes
- Internal dimensions:
B=1250mm, H=1650mm, L=4100mm
- Working temperature:
up ca approximately 1100° celsius
- 10 propane burners
- Heating effect: 870 kW

ANCHOR/ MOORING PLATE HOLDER

EIVA-SAFEX - Production of anchors and a mooring plate holder which has been developed in cooperation with the Norwegian seafarming industry. The mooring plate holder is a tool which has greatly improved safety when performing maintenance on fish farming installations.
